Oracle9*i*

Installation Checklist

Release 1 (9.0.1) for Linux Intel

June 2001

Part No. A90455-01

Purpose of this Checklist

The table in this document is a checklist for you to use to assist you in preparing to install Oracle9*i*.

Instructions

Use the *Oracle9i Installation Guide Release 1 (9.0.1) for UNIX Systems* and the release notes for your platform to ensure that all required steps are completed. When you have completed this checklist, use it to help you provide information you will be prompted for during installation.

> **Note:**   This checklist is not a substitute for the *Oracle9i Installation Guide Release 1 (9.0.1) for UNIX Systems.* Use this checklist in conjunction with the installation guide and the Oracle9*i* release notes for Linux Intel.

The column on the left indicates requirements to be met, tasks to be completed, and information to be obtained before you begin to install Oracle9*i*. Use the column on the right to mark that you have confirmed you have minimum requirements, mark that you have completed tasks, and write any required information.

Installation Checklist to Install Oracle9*i*	
Installation Requirements--Hardware	**Requirements Confirmed?**
